Compact Commercial Cutlery Polisher

Model CP-3000

Nothing says more about a restaurant than sparkling clean, spot-free cutlery. And nothing gets the job done easier and faster than Bar Maid's CP-7000 High Output Commercial Cutlery Polisher and CP-3000 Compact Commercial Cutlery Polisher.

- **Efficient and easy to use...** Dry and polish warm, wet cutlery right out of the dishwasher.
- **Fast payback...** The CP-7000 dries and polishes up to 7,000 pieces per hour and the CP-3000 up to 3,000 pieces per hour, significantly reducing labor and other costs associated with hand-polishing.
- **More sanitary...** Reduces the potential for contact with unhygienic hands and towels. Cutlery passes through a safe, chemical free UV-C sanitation process.
- **Portable...** Both the CP-7000 and CP-3000 have a relatively small footprint that fits most work tables or the optional CP7C wheeled cart for easy portability and storage.
- **Spotless reputation...** Maintain customer confidence in cleanliness, as spotty or streaky cutlery can give the impression it is not clean.
- **2 Models...** Choose the cutlery polisher that suits your needs based on cutlery volume and available space.

Specifications:

Model CP-7000

Voltage: 110-120V AC 50/60 Hz
630-750W 6.25 Amps
(220-240V AC 50/60 Hz available)

Weight: 139lbs

Shipping Weight: 177lbs (including pallet)

Product size: 25.6 x 24.5 x 19" (approx.)

Carton size: 35 x 30 x 27" (including pallet)

Initial organic compound included

Approvals by ETL to: UL, CSA

Model CP-3000

Voltage: 110-120V AC 50/60 Hz
462-550W 4.6 Amps
(220-240V AC 50/60 Hz available)

Weight: 106lbs

Shipping Weight: 130lbs (including pallet)

Product size: 22.4 x 20.5 x 17" (approx.)

Carton size: 36 x 28 x 25" (including pallet)

Initial organic compound included

Bar Maid Cutlery Polishers... simple and easy operation.

Simply insert 8-10 pieces of cutlery, handles toward the front of the machine, in the top chute every 5 to 10 seconds. Cutlery vibrates through warmed organic granulate (150-170°F) drying and polishing cutlery. UV-C exposure sanitizes before cutlery exits helping to eradicate any potential bacteria remaining from the washing process. Polished, dry, sanitized cutlery exits from the side chute into a clean bus pan or rack, ready to impress your customers.

Organic Polishing Compound

CP-REFILL

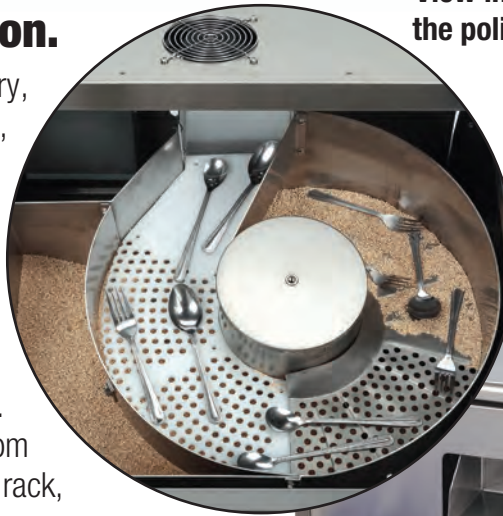

An organic polishing compound for use in the CP-7000 and CP-3000 Cutlery Polishers

Wheeled Cart

CP7C

Handy wheeled cart for use with the CP-7000 and CP-3000 Cutlery Polishers increases ease of portability.
